

Short explanation of important icons

To ensure that the program works correctly, please use the browser "Edge".

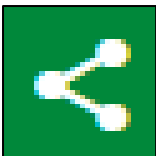

Allows to view up to 3 x 2 slides simultaneously

Allows to synchronize the zoom factor as well as the zoom position of several slides

To do so,

- decide in "layout options" how many slides you want to study simultaneously
- zoom in on one slide to the area you want to inspect
- zoom in on the next slide into the same area you want to inspect
- click the "Synchronize" button to lock them in sync (a small lock appears)
- then Zoom in and out, to zoom all slides simultaneously

Allows you to share slides with others (that need not be signed up for the platform) via the generated link. When they see the slides, they can also opt to see all the slides (see layout options)
